

SPAM Filters ใช้เมื่อต้องการกำหนดรับหรือไม่รับอีเมลจากแหล่งต่าง ๆ

E-Mail Filters		
Block a specific e-mail address:	<input type="text"/>	<input type="button" value="Block"/>
Block mail from an entire domain:	<input type="text"/>	<input type="button" value="Block"/>
Block all e-mail containing the word:	<input type="text"/>	<input type="button" value="Block"/>
Block all e-mail larger than:	<input type="text"/> KB	<input type="button" value="Block"/>
Enable adult filter: (blocks out common adult phrases, words, and addresses) <b>Disabled</b>		<input type="button" value="Enable"/>
Action for filter matches:	<input checked="" type="radio"/> Drop Email <input type="radio"/> Send to spambox	<input type="button" value="Save"/>
Filter	Value	Select
No Data to Show		
		<input type="button" value="Delete Selected"/>

Note: the word filter matches partial words. For example, if you block the word "put" and the email contains "computer", then the email will be blocked. If you expect it to be it's own word, then block " put ", with spaces beside it to avoid partial matching.
